

AI Declaration

Google Gemini and Chat GPT were used in this assessment.

We acknowledged using AI tools as a learning and debugging aid while completing Task 1, Task 2 and Task 3 of this assignment. The AI was used only to provide general ideas, summarising assessment specifications, explaining C programming concepts, explaining parallel computing concepts (POSIX Threads and OpenMP), debugging, writing testing code, plotting performance graphs, understanding code errors, improving presentation slide quality, explaining parallel computing terminologies, and suggesting possible approaches when we were stuck in the progress. The links are attached below.
